How to Access Information about ASWM Webinars

The screenshot displays the ASWM website interface. At the top, a blue header reads "Association of State Wetland Managers - Protecting the Nation's Wetlands." Below this is a navigation bar with buttons for Home, ASWM, I Am..., Wetlands, Science, Wetland Programs, Watersheds, Law, News & Jobs, and Blog. A search bar labeled "Search ASWM" is positioned below the navigation. On the left side, a "Main Menu" lists various options, with "Webinars" circled in yellow and an arrow pointing to it. Below the menu is a "Member's Login" section with fields for Username, Password, and a "Remember Me" checkbox. The main content area features a large article titled "Corps Publishes Proposal To Reissue and Modify Nationwide Permits in Federal Register" with a detailed text block. To the right of the article is a section titled "ASWM FACEBOOK POSTINGS" featuring a post by Sharon Weaver with a book cover titled "The Wetland Wanderer". At the bottom of the main content area, there is a section for "Upcoming ASWM Webinars" which lists several events with dates and topics, and includes links to view webinar pages and a complete list of recorded webinars. An arrow points to this section from the right side of the page.

Corps Publishes Proposal To Reissue and Modify Nationwide Permits in Federal Register

The U.S. Army Corps of Engineers (Corps) is soliciting comments for the reissuance of the existing nationwide permits (NWP), general conditions, and definitions, with some modifications. The Corps is also proposing to issue two new NWPs and one new general condition. The Corps is requesting comment on all aspects of these proposed nationwide permits. The reissuance process starts with this publication of the proposed NWPs in the *Federal Register* for a 60-day comment period. The purpose of this *Federal Register* document is to solicit comments on the proposed new and modified NWPs, as well as the NWP general conditions and definitions.

A close-up photograph of green plants with purple flowers, likely a species of Iris or similar aquatic plant, growing near water. The plants are in sharp focus, with some leaves and flower stalks in the foreground and others blurred in the background. The lighting is bright, suggesting a sunny day.
